

Dear Sir or Madam,

I am looking for the programmer position from September to November of this year. I am writing you as i understand that Empar may have appropriate vacancy available. I have a strong interest in web developing since I discover it at my secondary school. As I live only 2 miles from your site, travel and accommodation would not be a problem for me.

I first became interested in the company environment after a school visit to a company called IncluIT. I was taken on a tour around the different projects from the company from mobile apps to electronic car projects. Since then I am sure that I want to work as a programmer.

Through my High School I was able to develop my interest in programming and in DataBase design, I have some experience in group working and I have good programming skills in Python. While studying in High School, I passed the First Certificate Exam at the age of seventeen.

I would be most grateful if you could consider me for any suitable positions. I will be available for interview at any time and am at my home address in Cranford from late May onwards. At all other times I can be contacted at my college address. Please find enclosed my CV where you will find further information.

Yours sincerely.

Miranda Gonzalo
